SDSU Physiological Correlates of Behavior 760

Professor:
Marty Sereno -- email: msereno@sdsu.edu
class time (2021): MWF 9:00-9:50 AM (opt.: F 8:00-8:50 AM)
Learning Glass lecture recording location: SSW 2667
office hours: Mon 10-11 or by appt.
lectures Zoom-streamed and recorded, tests on lecture content

Readings/Content:
readings, lecture videos (links, top of course homepage)
background reading (neuroscience reference texts):
background reading (undergrad neuroscience textbooks):

Exams:
multiple question short-answer, each question with several subsections, test pdf link posted at 9 AM on exam day morning, email pics of filled-in exam pages by 11 AM
2 midterms, final (midterms: 24% each, final: 32%), and short final paper (20%)
old pdf answer keys from my similar UCSD Systems Neuroscience course here and here

Learning Objectives:
Students will be able to do the following:
(1) describe neuronal electrochemistry, development, and relation to simple dendritic, Hebbian, and attractor models
(2) diagram neuroanatomical structures/connections from low to high levels in visual, somatosensory, auditory sensory systems
(3) diagram structures/connections involving superior colliculus, cerebellum, striatum, motor cortex, and limbic systems
(4) analyze sequential processing stages in visual, somatosens., and auditory systems from signals and systems perspective
(5) describe neural models of eye movement planning, hierarchical motor control, and body position and orientation
N.B.: consult with me if a disability hinders your performance so we can use University resources to maximize learning

Lecture Topics: (Spring 2021)

Week of Jan 18 (WF) -- Introduction
[Mon: no class]
introduction to course
membrane (Nernst) potential

Week of Jan 25 (MWF) -- Cellular Physiology
action potential, voltage-gated channels
post-synaptic potentials, ligand-gated channels
NMDA channels, synaptic-timing-dependent plasticity

Week of Feb 01 (MWF) -- Relation to Neural Models
dendritic propagation, equivalent circuits
relation to simple Hebbian network models
relation to simple attractor network models

Week of Feb 08 (MW) -- Neural Development
gastrulation, neural plate, neural tube, optic cup
cylindrical coordinate system, temporal lobe formation
the 'rule of Sereno'

Week of Feb 15 (MWF) -- Visual System I
retinal circuitry and streams
dlGN (layers, non-lagged/lagged)
visual map structure (conformal maps)

Week of Feb 22 (MWF) -- Visual System II
general scheme for cortical layers
edges, brightness, and primary motion in V1
1st midterm review
1st Midterm Exam -- Fri, Feb 26

Week of Mar 01 (MWF) -- Visual System III
aperture problems in general (color intro)
aperture problems for vis. pattern translation, optical flow
visual attention
visual object recognition

Week of Mar 08 (WF) -- Somatosensory System
[Mon: no class]
somatosensory receptor types
arm diagram (length, force, alpha/gamma motoneurons)
pathways (dorsal column, spinothalamic, spinocerebellar)

Week of Mar 15 (MWF) -- Auditory System I
somatosensory cortical areas
somatosensory cortical plasticity auditory transduction and hair cell receptors, cochlear transduction

Week of Mar 22 (MWF) -- Auditory System II
monaural cochlear nuclei responses
auditory brainstem sound localization, construction of space map

Week of Mar 29 (MF) -- Finish Auditory, Motor System I
echolocation and speech sound processing
auditory cortical areas
[Wed: no class]
gaze stabilization (VOR, OKN, pursuit)

Week of Apr 05 (MWF) -- Motor System I
superior colliculus retinal and motor maps
sensorimotor coord transforms (double-step memory saccade)
multi-sensory map interactions -- sup. collic visual/auditory
multi-sensory map interactions -- VIP somatosensory/visual

Week of Apr 12 (MWF) -- Motor System II
motor system overview
cortical and spinal pattern generators
motor cortex
2nd midterm review
2nd Midterm Exam -- Fri, Apr 16

Week of Apr 19 (MWF) -- Motor System III
cerebellum anatomy, physiology
cerebellum and learning/conditioning connectional overview
connectional/functional overview striatum
striatum and hierarchical sequencing

Week of Apr 26 (MWF) -- Limbic System
connectional overview limbic system
H.M. and intermediate term memory vs. inertial guidance
place cells
head direction cells
grid cells
models: theta rhythms, attractor networks

Week of May 03 (MW) -- Neuroimaging EEG/MEG
hardware, spin vs. precession, Bloch equation
spin echo and gradient echo
phase-sensitive detection, intro to complex numbers,
frequency-encoding -- incorrect and correct intuitions
signal-to-noise
neural source of EEG/MEG signals
current source density, linear forward solution
course review

May 10 -- Final Exam 8-10 AM
Graduate students: final paper due May 13
